Honeywell

We've Got You Covered

A Path of Protection

No matter what technology you choose, all alarm signals are processed through AlarmNet's Network Control Center. Supervised 24 hours a day, the Control Center sends your signal to the central station to protect your business 365 days of the year.

Don't leave your family vulnerable.
Trust AlarmNet with your security
protection needs.

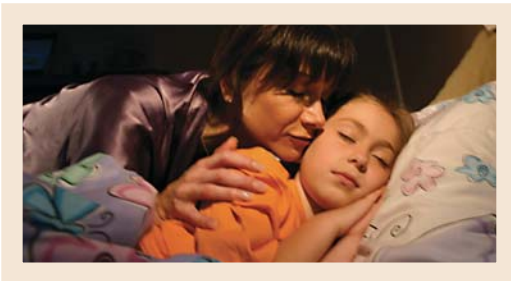

If the phone lines are cut, the alarm signal can't get

Using the most reliable communications technology, the AlarmNet service does not rely on vulnerable phone lines, ensuring that your signal gets through so you get the help you need.

Put Your Mind at Ease

A home security system gives you comfort when you sleep at night. And keeps your valuables protected when you're away from home.

In a fire or burglary emergency, the system gets you the help you need by seizing the phone line and dialing the central station. If the phone lines are cut, the alarm signal can't get through. That's when AlarmNet's got you covered.

through. That's when AlarmNet's got you covered.

A Communications Leader

Honeywell's AlarmNet has been the nationwide leader in alarm communications technology since 1986.

You will have our AlarmNet Network Control Center working for you. The Control Center receives all alarm signals and immediately routes the signal to the central station so help is on the way.

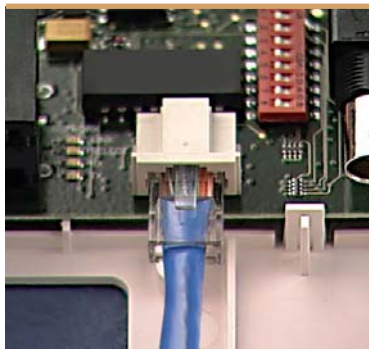

A Variety of Choices

You can choose from the latest in GSM digital cellular, Internet, or a combination of both to deliver the alarm signal from your home. GSM communications is extremely reliable and offers virtually limitless coverage.

Cellular Tower

- Our **Internet** service uses 1,024 bit encryption to provide the absolute best in data security.

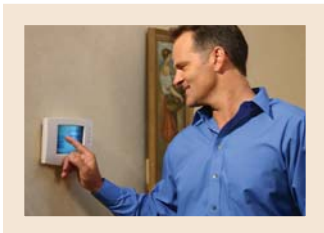

AlarmNet Products

Near or far from home, our products keep you secure in knowing that your home is well cared for.

Our wide range of products are a reliable solution for the transmission of alarm signals.
